

DEZAWA

AESTHETICS™

THE SCIENCE BEHIND DEZAWA® MUSEEXOSOMES®

Dezawa MuseExosomes® come from specialized Dezawa MuseCells®, known for supporting natural repair and renewal. These exosomes act as tiny messengers, helping skin cells communicate and function optimally. They work in harmony with your body's natural regenerative processes.

REJUVENATION BENEFITS

When applied to the skin, Dezawa MuseExosomes®:

Improve skin texture, tone, and elasticity

Reduce the appearance of fine lines, scarring, & surface irregularities

Enhance hydration and barrier function

Promote healthier collagen architecture over time

Calm inflammation and support overall skin resilience

Each kit contains carefully prepared components designed to ensure freshness, potency, and optimal performance:

5 x Lyophilized Dezawa MuseExosomes®

(60mg each)

The exosomes are preserved in a freeze-dried form to maintain stability and integrity. This process protects their activity until the moment of preparation, ensuring maximum vitality when applied.

5 x Hyaluronic Acid Diluent

(3mL each)

A medical-grade Hyaluronic Acid solution used to activate and deliver the exosomes. Hyaluronic Acid hydrates the skin, enhances smoothness, and supports a refreshed appearance.

Together, these components are prepared immediately before treatment to deliver both instant hydration and ongoing skin renewal support.

FOCUS

Support focus on skin revitalization, designed to promote a refreshed appearance.

ENHANCE

Provide an experience with immediate hydration and visible radiance.

ELEVATE

Offer a multi-faceted approach to skin care that aligns with evolving innovations in aesthetics.
